

*“How do you know you’re the exemplar or need improvement if you don’t compare yourself with your Australian & New Zealand peers?”*

### 2020 Improvement Group & Workshop

The theme of the 2020 End of Life Care Improvement Group “death and bereavement care; measuring quality of dying and models of bereavement support”.

The aim of the End of Life Care Improvement Group is to improve the provision of high quality end of life care by sharing information on implementing innovative and effective practice. This forum provides a collaborative environment to share data and stories about caring for individuals and families at the end of life. The intended outcome to embed the importance of quality End of Life care in the whole of health system.

The End of Life Care Improvement Group meeting is an excellent forum for discussion and a great opportunity to hear from leading experts in the field and share innovations from our membership. We hope you can join this growing group and share your wisdom as well as gaining new knowledge from your peers.

### What do group subscribers receive?

- The group receives the EOLC Benchmarking reports twice a year (calendar year and financial year periods). These reports contain both operational & clinical indicators.
- The End of Life Care benchmarking report for all in-hospital deaths during the annual time period.
- The Paediatric End of Life Care report which is limited to in-hospital neonatal and paediatric in hospital deaths.
- We have an exciting addition to the EOLC report suite, Quality of Dying Audit, which includes quality of dying indicators, including evidence of end of life conversation, advance directives, medical guidance plans and anticipatory symptom management. This takes the form of a chart audit, using Quality of Dying Audit tool developed by Canterbury which is then linked to your casemix data.
- Independent perspective on performance compared to other Australian & New Zealand health services.
- Standardised set of processes and metrics.
- Highlight successful performance for celebrating.
- Identify performance gaps for improvement.
- Set and monitor performance expectations.
- Encourage a mindset & culture of continuous improvement.

**What does Health Roundtable provide?**

- Large scale data collection, cleansing & data aggregation
- Professional interactive and static reporting providing analytical insights for decision making
- Report benchmarking against peer facilities including identifying exemplars to facilitate best practice through innovation and collaboration
- Facilitate improvement group workshops for collaboration of innovative solutions to improve client care

**The Benefits of Benchmarking**

- Independent perspective on performance compared to other Australian & New Zealand health services
- Standardised set of processes and metrics
- Highlight successful performance for celebrating
- Identify performance gaps for improvement
- Set and monitor performance expectations
- Encourage a mindset & culture of continuous improvement
