Rising to the challenge;

strengthening capacity and capability to care for children and families

The theme of the 2020 meeting is "Rising to the Challenge; strengthening capacity and capability to care for children and families" where we will explore the challenges of caring for children and their families with a focus on children with complex needs. And raising the profile of your paediatric service within tertiary and general hospitals.

The goals of the group are to:

- The group will examine different models of care
- Improve care for patients with chronic conditions and complex needs
- Reduce unplanned avoidable readmissions
- Learn how the exemplar hospitals are working together with other hospitals and primary care providers to improve integration of care
- Promote paediatrics as a specialty within health service
- Share innovations in practices with an aim to improve experience and outcomes for children and their families.

Our aim is to provide a forum to discuss members success and challenges in caring for children and their families and leave inspired and with ideas and an action plan to improve patient care and outcomes.

Paediatric Care Improvement Group

What do you need to do?

- ❑ Designate a key liaison contact for questions and follow-up
- ❑ Regularly review updated reports for questions, comments or issues
- ❑ Report on progress made on improvement aims
- ❑ Organise a multi-disciplinary team to attend the annual workshops
- ❑ Identify improvement objectives for implementation based on innovative ideas learnt

What does The Health Roundtable do?

- ❑ Produce tailored 'Paediatric only' reports six monthly extracting data from the inpatient episode collection, highlighting trends and differences in performance
- ❑ Invite expert speakers who can share innovative ideas on the key topic for the workshop
- ❑ Facilitate the annual meeting, and provide help identifying innovative practices for implementation
- ❑ Liaise with the Paediatric Steering Group to make sure The Health Roundtable data and meetings are relevant for your priorities

Benchmarking Reports

The suite of benchmarking reports includes the following paediatric specific reports (<17 years) produced 6 monthly:

- Emergency Department
- Hospital KPIs
- Top 10
- Australian National Standards
- Hospital Acquired Complications (HAC)

Plus a comprehensive suite of inpatient reports limited to <17 years of age available on AORTA (quarterly)

Comments from previous workshops:

- Great discussion
- My first HRT – loved the group dynamic of collegiality and sharing.
- Wow moments. Linking with other services. People/places have undergone similar challenges and have found great solutions.
- Great resources on website

The Health Roundtable helps health executives learn how to achieve best practice in their organisations. We collect and analyse operational and clinical data of our member organisations to search for innovations in patient care. We promote collaboration and networking amongst health executives and staff through our roundtable meetings, workshops, and other activities.
