In 2018, we are hosting a one day certification training to enable Hospital staff become Super Users of the Health Roundtable data reports. We will help you to review and understand your organisations' reports from the last 12 months. This will follow on from the Data Review Workshop held 16-17 May 2018 in Brisbane.

The certification will involve

- » Structural questioning template (training materials)
- » Pre-work
- » Dive into own reports to answer questions
- » Roundtable data experts to help

## Structure

- What
- Where
- When
- Extent
- Other safety & quality issues

Using relevant questions for each of the reports, to come to a 'better conclusion' and get clarity.
