

Patient Safety Improvement Group (B7)

14-15 November 2018, Sydney

Meeting Code HRT1821

The Patient Safety Improvement Group aims to address National Standards and develop continuous risk management improvements to improve the safety of care and reduce variation.

Why Participate?

- ❑ *Identify and share "Good Practice" techniques to reduce harm*
- ❑ *Compare with peer hospitals on risk-adjusted adverse event data*
- ❑ *Compare notes on how to make sustainable improvements in patient safety*
- ❑ *Develop Action Plans to make specific improvements over the next 12 months*

Members of the Patient Safety Improvement Group meet annually to share ideas and innovations that focus on improving the safety and quality of care within their health services. They monitor progress against the Health Roundtable Patient Safety Checklist and share information on the latest patient safety and quality initiatives.

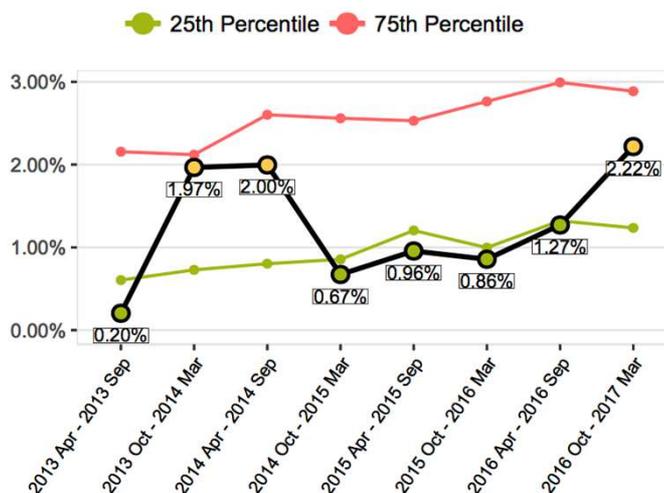

At the meeting members will share experiences and information on implementing innovative and effective practices and review results from the redesigned Patient Safety report that is provided 6-monthly.

The Health Roundtable Patient Safety report and episode viewers enable you to clearly see the key opportunities for improvement to make your patients safer.

●●● NS8.1 Proportion of pressure injuries

Leaving Green For Yellow

Formula: [patients with pressure injury] / [total patients]

Patient Safety Improvement Group

What do you need to do?

- ❑ *Designate an executive sponsor as the key liaison for your health service to lead your patient safety work with The Health Roundtable*
- ❑ *Review definitions and updated reports for questions, comments, or issues*
- ❑ *Report progress on current Aim Statements and improvement plans*
- ❑ *Organise a multi-disciplinary team to attend the annual workshop—up to four people*
- ❑ *Identify an improvement objective for implementation based on innovative ideas learnt at the workshop, and track progress*

The Health Roundtable assists by:

- ❑ *Working with key patient safety contacts to organise the annual meeting including designing and reporting back the results from a member survey*
- ❑ *Inviting expert speakers who share innovative ideas on the key topic for the workshop*
- ❑ *Facilitates the annual meeting, and provides a summary report based on the discussions*
- ❑ *Produces reports extracting data from the inpatient episode collection, highlighting trends and differences in performance*
- ❑ *Provides phone and webcast support to all members to assist with data interpretation*

The Patient Safety meeting is one of the largest meetings that the Health Roundtable convenes each year. It provides a great opportunity to:

- Network with a large number of health services from Australia and New Zealand
- Understand Patient Safety data from your own hospital and benchmark with others
- Gain more information on Health Roundtable indicators and data analysis
- Spend sequestered time away from the hospital with your team
- Use HRT data to get 'accreditation ready'
- Learn from your peers through the many member hospital innovations that are presented each year

The Health Roundtable helps health executives learn how to achieve best practice in their organisations. We collect and analyse operational and clinical data of our member organisations to search for innovations in patient care. We promote collaboration and networking amongst health executives and staff through our roundtable meetings, workshops, and other activities.
