

The Medical Patient Journey Improvement Group

You cannot hope to build a better world without improving the individuals. To that

end, each of us must work for his own improvement

and, at the same time, share a general responsibility for all humanity, our particular duty being to aid those to whom we think we can be most useful.

Marie Curie

HEALTH ROUNDTABLE IMPROVEMENT GROUPS:

Sharing new ideas and solutions to common challenges

Health Roundtable's Improvement Groups provide subscribers the opportunity to understand how hospitals are innovating and improving patient outcomes across Australia and New Zealand. They consist of three components:

- Detailed comparable benchmarking reports with data analysis and deep insight, survey results and expert knowledge
- A two-day cross-jurisdictional Workshop, providing an opportunity to discuss the insights, review the latest (and most impactful) innovations, network and learn from exemplar hospitals and experts.
- Direct access to HRT analysts and specialist mentors as well as community engagement with peer patient care teams

Members of Health Roundtable may subscribe to the several Improvement Groups on offer each year.

Who should join the Group?

The Medical Patient Journey Improvement Group is oriented to members such as:

Director of Medical Services

Director of Quality care/ systems

Director of Nursing

Director of Performance Improvement

Leaders in Allied Health

Divisional Managers aged care, general medicine, medical services

The Medical Patient Journey Improvement Group

Is a serious overhaul of the episodic model of care inevitable?

This Improvement Group targets better care for patients with chronic conditions. It benchmarks the patient's journey through the hospital system, identifies opportunities and considers the best setting for continued care and reduced readmissions - key quality issues for us all.

As such, the Group really goes to the very heart of health service delivery.

Innovative hospital-wide strategies to develop more efficient models that also better align with patient interests - particularly for complex patients - are underway. The Medical Patient Journey Improvement Group provides the opportunity to learn more about, share, examine and discuss these core issues.

The Workshop - “Outcome-based models of care for complex patients - exploring best practice for the bariatric and frail patient”.

April 3-4, 2019 Brisbane QLD

Have you focussed efforts specifically on reducing falls or pressure injuries? How do you document and report BMI data and frailty scores? How can you reduce your HAC (Hospital Acquired Condition) reports in relation to patient frailty? Do you have a Bariatric Care Team?

This Workshop will explore the escalating challenges of caring for bariatric and frail patients many of whom have chronic conditions, represent more often and are at a higher risk of hospital acquired complications.

Attendees will share and review innovations and improved patient outcomes.

Chronic disease is our greatest health challenge, causing the most premature deaths and disability in Australia and most other countries

The Australian Prevention Partnership Centre

About Health Roundtable

The Health Roundtable helps health executives and clinicians learn how to achieve best practice in their organisations.

We collect and analyse operational and clinical data of our member organisations to search for innovations in patient care.

We promote collaboration and networking amongst health executives and staff through our roundtable meetings, workshops, and other activities.

What Group Subscribers receive

- A personalised annual benchmarking report identifying exactly how your facility compares with other hospitals across Australia and New Zealand, highlighting key areas for you to focus your efforts on. This year the report focusses on patients with COPD, stroke, diabetes, chronic heart failure and dementia and for the first time includes outcomes related to back pain
- Shared data from our member organisations built into reports based on recommendations from The Australian Commission on Safety and Quality in Health Care that provide insights, create benchmarks and identify opportunities for improvement
- Access to participate in the annual Workshop; unlimited delegates at a modest per head cost (more details overleaf). In response to our members' request for help in improving outcome-based models of care for complex patients, this year's workshop targets best practice for bariatric and frail patients
- Advice and support to develop practical action plans to improve your service over the next year

How to subscribe and attend

What previous attendees thought of the workshop:

“Very informative and well organised”

“Great presenters and excellent facilitation”

“Very good conference. Not bored. Kept us engaged”

“I got a lot of learning and ideas from sessions”

Subscription to the Innovation Group
\$A5,250 excl GST

Workshop attendance
\$395 per delegate.
